

Internet of Things JULY-2024 Assignment

WEEK 1 Assignment

Q1. IoT stands for

- a. Internet of Tasks
- b. Internet of Tuples
- c. Internet of Things
- d. None of these

Q2. Which of the following technologies have unified and has resulted in the evolution of IoT?

- a. High-power embedded systems
- b. Super Computing
- c. Engine Technology
- d. None of these

Q3. Which of the following are the enables of IoT?

- (a) RFID
- (b) Nanotechnology
- (c) Sensors
- (d) All of these

Q4. Which of the following is NOT a function of an IoT Gateway?

- a. Connects the IoT LAN to a WAN
- b. Can implement several LAN and WAN
- c. Both (a) and (b)
- d. Neither (a) Nor (b)

Q5. State whether the following statement is True or False.

Statement: "The ITU vision is approaching reality as the present-day networked devices have outnumbered humans on earth."

- a. True
- b. False

Q6. State True or False.

Statement: "In Multi-homing, a node/network is connected to multiple networks for improved reliability."

- a. True
- b. False

Q7. Which of the following are the features of an IoT Gateway?

- a. A router connecting IoT LAN and WAN to Internet
- b. Can implement several LAN and WAN
- c. Forwards packets between LAN and WAN
- d. All of these

Q8. State True or False.

Statement: "IoT Proxy performs active application layer functions between IoT nodes and other entities."

- a. True
- b. False

Q9. The Gateway has a globally. address prefix, which can be used to identify them

- a. Non-unique
- b. Unique
- c. Both (a) and (b)
- d. Neither (a) nor (b)

Q10. The IPv4 notation uses number of bits to represent an address.

- a. 33
- b. 32
- c. Both (a) and (b)
- d. Neither (a) nor (b)

Q11. The "Destination Address" field in the IPv4 header is of bits in length.

- a. 32
- b. 64
- c. 128
- d. None of these

Q12. We can sense temperature using ?

- a. An actuator
- b. A Transducer
- c. A processor
- d. None of these

Q13. State True or False.

Statement: "A sensor is not only sensitive to the measured property, but it also influences the measured property."

- a. True
- b. False

Q14. Based on the output, sensors are classified as.....

- a. Scalar and Vector
- b. Analog and Digital
- c. Both (a) and (b)
- d. Neither (a) nor (b)

Q15. What is the full form of SMP in the context of IoT actuators?

- a. Shape Master Polymers
- b. Switch Mode Power
- c. Sensor Making Polymer
- d. None of these

@Exam
Buddy

WEEK 2 Assignment

Q1. Based on functionality, MQTT is a..... protocol.

- a. Transport
- b. Data
- c. Semantic
- d. None of these

Q2. MQTT is a protocol. -based lightweight protocol for use in conjunction with TCP/IP

- a. Client-Server
- b. Publish-Subscribe
- c. Both (a) and (b)
- d. Neither (a) nor (b)

Q3. A controls the publish-subscribe messaging pattern in MQTT.

- a. Publishers
- b. Subscribers
- c. Broker
- d. None of these

Q4. State True or False.

Statement: "In MQTT, the Publishers are Lightweight Sensors."

- a. True
- b. False

Q5. Which of the following is MQTT designed for?

- a. Remote connections
- b. Limited bandwidth
- c. Small code footprint
- d. All of these

Q6. Ato which a client is subscribed is updated in the form of messages and distributed by the

- a. **Topic, Message Broker**
- b. Message Broker, Topic
- c. Message Broker, Message Broker
- d. Topic, Topic

Q7. There are..... number of methods in MQTT protocol.

- a. 5
- b. 4
- c. **6**
- d. None of these

Q8. State True or False.

Statement: "Publish/Subscribe in MQTT is event-driven and enables messages to be pushed to clients."

- a. **True**
- b. False

Q9. SMQTT stands for?

- a. **Secure MQTT**
- b. Safe MQTT
- c. Safety in MQTT
- d. Stored MQTT

Q10. Similar to HTTP, CoAP utilizes which of the following for operation?

- a. GET
- b. PUT
- c. PUSH
- d. **All of these**

Q11. State True or False.

Statement: "The CoAP protocol is a Client-Server interaction-based protocol that is asynchronous over a datagram-oriented transport protocol such as UDP."

- a. **True**
- b. False

Q12. What is the full form of M2M in the context of IoT protocol?

- a. Message to Message
- b. Man to Message
- c. Message to Man
- d. None of these

Q13. What is the basic unit of data in the AMQP protocol?

- a. Chunk
- b. Byte
- c. Slit
- d. None of these

Q14. State True or False.

Statement: "The OSI model has 9 layers."

- a. True
- b. False

Q15. The "Destination Address" in the IPv4 packet represents which of the following?

- a. The destination node address of the packet
- b. The intermediate hop in the network
- c. Both (a) and (b)
- d. Neither (a) nor (b)

WEEK 3 Assignment

Q1.State True or False.

Statement: "Wireless HART is the latest release of Highway Addressable Remote Transducer protocol."

- a. True
- b. False

Q2. State True or False.

Statement: "Wired HART does not have a network layer."

- a. True
- b. False

Q3. Wireless HART physical layer is derived from protocol?

- a. 802.15.4
- b. 802.15.2
- c. 802.15.3
- d. 802.15.6

Q4. Wireless HART operates only in GHz ISM band.

- a. 3.7
- b. 4.8
- c. 4.8
- d. None of these

Q5. Wireless HART employs and exploits channels of the ISM band to increase reliability.

- a. 13
- b. 4
- c. 2
- d. None of these

Q6. State True or False.

Statement: "Channel blacklisting identifies channels consistently affected by interference and adds them from use again."

- a. True
- b. False

Q7. The Wireless HART incorporates and to increase the reliability and security of the network.

- a. Channel hopping and Channel Blacklisting
- b. Channel Aggregating and Frequency Aggregating
- c. Both (a) and (b)
- d. Neither (a) nor (b)

Q8. State whether the following statement is True or False

Statement: "Wireless HART protocol relies on Mesh Networking for its communication, and each device is primed to forward packets from every other device."

- a. True
- b. False

Q9. State True or False.

Statement: "ZigBee protocol does not feature channel hopping at all."

- a. True
- b. False

Q10. NFC is designed for use by devices within to each other.

- a. Close proximity
- b. Anywhere on the globe
- c. A small building
- d. None of these

Q11. NFC are of types?

- a. 2
- b. 3
- c. 1
- d. None of these

Q12. State True or False.

Statement: "Smartphones are an example of active NFC devices."

- a. True
- b. False

Q13. Bluetooth technology is based on

- a. HART
- b. ZigBee
- c. Ad-hoc piconets
- d. None of these

Q14. State whether the following statement is true or false.

Statement: The Link Manager Protocol in Bluetooth manages the establishment, authentication, link configuration.

- a. True
- b. False

Q15. Zigbee commonly uses..... data rate.

- a. 250 Mbps
- b. 260 kbps
- c. 260 Mbps
- d. None of these

WEEK 4 Assignment

Q1. State whether the following statement is true or false.

Statement: Coverage in WSN is defined as the entire area is covered satisfactorily.

- a. True
- b. False

Q2. State True or False.

Statement: "In Wireless Sensor Network coverage, we study how to deploy or activate sensors to cover the monitoring area."

- a. True
- b. False

Q3. Water reservoir overflow monitoring in WSN is an example of which type of reporting?

- a. Event driven

- b. On-demand
- c. Scattered
- d. None of these

Q4. State whether the following statement is true or false.

Statement: Objective of coverage in WSN is to use minimum number of sensors and minimize network lifetime.

- a. True
- b. False

Q5. State whether the following statement is true or false.

Statement: "Sensor nodes in WSN can be of two types - 1. Static sensor nodes, and 2. Mobile sensor nodes."

- a. True
- b. False

Q6. An inventory control system is an example of ?

- a. Event-driven reporting
- b. On-demand reporting
- c. No sensing and reporting involvement
- d. None of these

Q7. Most problems in static WSN can be classified as -

- a. Area coverage
- b. Barrier coverage
- c. Both (a) and (b)
- d. Neither (a) nor (b)

Q8. What are the disadvantages of Stationary WSN?

- a. Node failure may result in the partition of networks
- b. Topology cannot be changed automatically
- c. Both (a) and (b)
- d. Neither (a) nor (b)

Q9. State True or False.

Statement: "MANET-infrastructure less network of mobile devices connected wirelessly in WSN follow the self-HOP properties."

- a. True
- b. False

Q10. In Mobile WSN, the Data Mules

- a. Collect the data from sensor nodes
- b. Goes to the sink and delivers the collected data
- c. Both (a) and (b)
- d. Neither (a) nor (b)

Q11. senses different under the sea or water level parameters.

- a. UAV
- b. AUV
- c. Both (a) and (b)
- d. Neither (a) nor (b)

Q12. Humans carry their devices and move around. Sensors embedded within the devices record readings. Sensory readings are then transmitted for processing.

This paradigm of sensing is known as

- a. Machine Centric Sensing
- b. Device Centric Sensing
- c. Human Centric Sensing
- d. None of these

Q13. State True or False.

Statement: "Energy of Devices and Participant selection are two major problems in Human Centric Sensing."

- a. True
- b. False

Q14. Which of the following network topologies is used in UAV networks?

- a. Mesh
- b. Star
- c. Both (a) and (b)
- d. Neither (a) nor (b)

Q15. The provides integrated services based on device collected data-sets.

- a. M2M Application Platform
- b. M2M Service Platform
- c. M2M Hardware Platform

d. None of these

@Exam
Buddy

WEEK 5 Assignment

Q1. When different processing logic are applied to the same IoT networked devices or applications, it gives rise to?

- a. Large scale of co-operation
- b. Semantic conflicts
- c. Both (a) and (b)
- d. Neither (a) nor (b)

Q2. State True or False.

Statement: "Interoperability is a characteristic of a product or system."

- a. True
- b. False

Q3. Interoperability is important in the context of IoT so that -

- a. Physical objects remain isolated
- b. Networks remain isolated
- c. Both (a) and (b)
- d. Neither (a) nor (b)

Q4. State whether the following statement is true or false

Statement: "Use of different programming languages such as JavaScript, Python, JAVA, and others is an example of heterogeneity in IoT. This brings in the need for interoperability."

- a. False
- b. True

Q5. State True or False.

Statement: "The interoperability between devices and device users in terms of message formats is called Syntactic Interoperability."

- a. True
- b. False

Q6. What is the full form of UMB in IoT interoperability?

- a. Universal Middleware Bridge
- b. Universal Main Bridge
- c. Universal Main Bracket
- d. None of these

Q7. Which of the following pins is NULL in the DHT-11 sensor?

- a. Pin 2
- b. Pin 4
- c. Both (a) and (b)
- d. Neither (a) nor (b)

Q8. Arduino MEGA microcontroller board is also known as?

- a. MEGA 3370
- b. MEGA 2570
- c. MEGA 9980
- d. None of these

Q9. A provides high-precision rotary motion of 0 to 180 degrees.

- a. Solenoid Valve
- b. Relay
- c. Servo Motor
- d. None of these

Q10. What does the following code snippet do in interfacing a servo motor with the Arduino MEGA board?

int servoPin = 12;

- a. Declares pin for connecting servo motor
- b. Declares pin for providing power to MEGA board
- c. Declares pin for Ground supply for servo motor
- d. None of these

Q11. What does the delay(1000); line do mean in an Arduino sketch?

- a. It introduces a delay of 1 second
- b. It introduces a delay of 10 seconds
- c. It introduces a delay of 100 milliseconds
- d. None of these

Q12. State True or False.

Statement: "Additional hardware is required to load a program into the Arduino Uno board using a computer."

- a. True
- b. False

Q13. Arduino Uno board has number of PWM pins?

- a. 9
- b. 4
- c. 8
- d. None of these

Q15. State True or False.

Statement: "The "Verify" option in the Arduino IDE checks the code for compilation errors."

- a. True
- b. False

WEEK 6 Assignment

Q1. State True or False.

Statement: "Python is popular for embedded application development as it is a very lightweight programming language."

- a. True
- b. False

Q2. State True or False.

Statement: "Python does not support strict rules for syntax."

- a. True
- b. False

Q3..... is a software that is used to write codes, integrate several modules and libraries.

- a. IDE
- b. Module
- c. API
- d. None of these

Q4. State True or False.

Statement: "To indicate different blocks of code, Python follows rigid indentation."

- a. True
- b. False

Q5. What is the output of the following line of code in Python?

```
>>> print "Hi, Welcome to python!"
```

- a. Hi, Welcome to python!
- b. "Hi, Welcome to python!"
- c. Hi, Welcome to python
- d. None of these

Q6. Which of the following is a mode to open a file in Python?

- a. Read mode
- b. Write mode
- c. Append mode
- d. All of these

Q7. State whether the following command to install the PIL library is correct or not.

```
sudo pip get pillow
```

- a. Correct
- b. Incorrect

Q8. How many data types are these in Python?

- a. 5
- b. 7
- c. 8
- d. None of these

Q9. State whether the following controlling statement structure is valid in Python or not.

```
if(condition):  
    statement 1  
    statement2  
elif(condition)  
    statement 1  
    statement 2  
else  
    statement 1  
    statement 2
```

- a. Invalid
- b. Valid

Q10. Can we configure Raspberry Pi as a Web Server?

- a. Yes
- b. No

Q11. What is the frequency of the Raspberry Pi Zero CPU?

- a. 2.1 GHz
- b. 1.1 GHz
- c. 3.1 Ghz
- d. None of these

Q12. What does the following line of code do?

sudo apt-get install python-rpi.gpio

- a. It installs the Raspberry Pi GPIO library
- b. It installs the Python essentials for GPIO
- c. Both (a) and (b)
- d. Neither (a) nor (b)

Q13. Which command Exits the nano editor?

- a. Ctrl + X
- b. Ctrl + O

- c. Ctrl + K
- d. None of these

Q14. What does the following line of code do?

GPIO.output(11,True)

- a. Sets GPIO 11 as output pin
- b. Turns on GPIO pin 11
- c. Neither (a) nor (b)
- d. Both (a) and (b)

Q15. What does the following line of code do?

raspistill -o image.jpg

- a. Captures video feed
- b. Captures still image
- c. Both (a) and (b)
- d. None of these

@Exam
Buddy

WEEK 7 Assignment

Q1. Adafruit provides a library to work with DHT22 Sensor.

- a. True
- b. False

Q2. Which python library is used for plotting the data in 2D.

- a. List
- b. Numpy
- c. Pandas
- d. Matplotlib

Q3. Fill in the blanks.creates a two-way communication between two nodes in a network.

- a. Peer-to-Peer Network
- b. Parallel Programming
- c. Socket Programming
- d. None of these

Q4. What are the two main challenges of SDN?

- a. File placement and Node placement
- b. Rule placement and Controller placement
- c. Both a and b
- d. Neither a nor b

Q5. IoT cannot control the network remotely.

- a. True
- b. False

Q6. Which of the following is a part of data processing?

- a. Splitting
- b. Filtering
- c. Neither a nor b
- d. Both a and b

Q7. What is introduced if a controller is down in SDN?

- a. Backup controller
- b. Intro controller
- c. Both a and b
- d. Neither a nor b

Q8. lon() is used to add a subplot in the data plotting in python.

- a. True
- b. False

Q9. Matplotlib cannot plot in 2D.

- a. True
- b. False

Q10. How many rules are deleted from the switch at hard timeout?

- a. None
- b. All
- c. Half
- d. Some

Q11. Are controllers able to handle all incoming requests from switches?

- a. Yes
- b. No

Q12. Are Indigo and LINC Open source?

- a. Yes
- b. No

Q13. Which of the following forward the sensed data based on the ID of the source node?

- a. ID-centric data forwarding
- b. Northbound IDs
- c. Both a and b
- d. Neither a nor b

Q14. How many requests can a controller handle through a single thread?

- a. 200/sec
- b. 50/sec
- c. Neither a nor b

- d. Both a and b

Q15. Switches that forward the traffic in a distributed manner have a global view of the network.

- a. True
b. False

WEEK 8 Assignment

Q1. Which of the following abstracts the physical resources from the network services?

- a. Path management
b. Routing protocols
c. Flow-table paradigm
d. Network Virtualization

Q2. In which of these, exact match rules are useful?

- a. Elephant Flow
b. Mice-flow
c. Both a and b
d. Neither a nor b

Q3. Which of these takes last k-th location instances to predict the next location?

- a. Odin-k Markov Predictor
b. Order-k Markov interpreter
c. Order-k Markov predictor
d. None of these

Q4. Which of the following is an important issue due to the dynamic nature of the IoT network?

- a. Match rules
b. Load rules
c. Match balancing
d. Load Balancing

Q5. Fill in the blank.

..... refers to heterogeneous computing nodes distributed over a wide area to perform very large tasks.

- a. Cluster Computing
b. Utility Computing

- c. Grid Computing
- d. None of these

Q6. Which of the following is a type of service model in cloud computing?

- a. SaaS
- b. PaaS
- c. IaaS
- d. All of these

Q7. Which of the following statements are true about SaaS?

Statement I: Applications are available as 'services'.

Statement II: End-users do not have the control of the cloud infrastructure.

Statement III: Services can be accessed by various types of client devices.

- a. Statements I and II
- b. Statements I and III
- c. Statements II and III
- d. Statement I, II and III

Q8. Fill in the blank.

..... means independent of device or location.

- a. Scalable
- b. Reliability
- c. Agile
- d. Ubiquitous

Q9. Fill in the blank.

..... provides the platform which allows developers to create applications which can be offered as a service via the Internet.

- a. Software-as-a-Service
- b. Storage-as-a-Service
- c. Network-as-a-Service
- d. Platform-as-a-Service

Q10. Fill in the blank. 'Dynamic scaling of the required infrastructure resources' is a feature of which of the essential characteristic of cloud computing.

- a. Scalability
- b. Availability
- c. Synchronization

d. None of these

Q11. Software-as-a-Service does not support a fully pay-as-you-go model.

- a. True
- b. False

Q12. What is the meaning of the Host Level Security at PaaS and SaaS level?

- a. Hide host OS from the end users
- b. Security responsibilities are transformed to Cloud service providers
- c. Both a and b
- d. Neither a nor b

Q13. Which of the following is an objective of Data Security?

- a. Confidentiality
- b. Integrity
- c. Availability
- d. All of these

Q14. CloudSim provides a cloud environment.

- a. True
- b. False

Q15. Which of the following is true about GreenCloud?

- a. GreenCloud cannot monitor the energy consumption of servers, switches, etc.
- b. GreenCloud was developed as an extension of GO.
- c. Neither a nor b
- d. Both a and b

WEEK 9 Assignment

Q1. Which of the following can be used to install OpenStack?

- a. devstack
- b. stack
- c. Swift
- d. All of these

Q2. Which of the following is/are the advantages of cloud computing?

- a. Elasticity
- b. Pay-per-use
- c. Self Service
- d. All of the above

Q3. Select the statement(s) that denote the limitations of WSNs.

Statement I: Procurement

Statement II: Deployment

Statement III: Maintenance

- a. Statement I
- b. Statement II
- c. Statements I, II, and III
- d. None of these

Q4. Which of the following plays a role in the sensor-cloud architecture?

- a. End-users
- b. Sensor-owner
- c. Sensor-Cloud Service Provider
- d. All of these

Q5. The managerial role is played by in sensor-cloud architecture.

- a. End-users
- b. Sensor-Cloud Service Provider
- c. Neither a nor b
- d. Both a and b

Q6. Which of the following is/are the components of the work-flow of the sensor-cloud.

- a. Virtual Sensor Manager
- b. Virtual Sensor Controller
- c. Resource Manager
- d. All of these

Q7. Who coined the term Fog computing?

- a. IBM
- b. CISCO
- c. Both a and b
- d. Neither a nor b

Q8. What of the following is responsible for allocation and deallocation of the resources?

- a. Sensor manager
- b. Sensor controller
- c. Sensor resource pool
- d. None of these

Q9. The sensor owner can only deploy homogeneous physical sensor nodes in the sensor cloud.

- a. True
- b. False

Q10. What is the function of Internal Cache?

- a. Handles requests from end-user
- b. Takes decision whether the data should be provided directly to the end user

- c. Neither a nor b
- d. Both a and b

Q11. What is the other term for fog computing?

- a. Foglog
- b. Cloud
- c. Dew
- d. Fogging

Q12. Fill in the blanks. Fog computing is an intermediate layer between..... And

- a. Dew and devices
- b. Cloud and devices
- c. Cloud and server
- d. None of these

Q13. Bandwidth refers to the bit-rate of data during analysis.

- a. True
- b. False

Q14. Which of the following is used by the fog applications to increase the speed of service accessibility?

- a. Low power
- b. Good network connection
- c. Accelerators
- d. Analytics

Q15. Fill in the blank. The concept of enables physical hardware to be shared among multiple entities.

- a. Hardware virtualization
- b. Software virtualization
- c. Module virtualization
- d. All of these

@Exam Buddy

WEEK 10 Assignment

Q1. Smart city is an system.

- a. local
- b. rural
- c. home
- d. urban

Q2. Which of the following is an area of focus in smart parking lots?

- a. Auto-routing of vehicles
- b. Auto-charging of vehicles
- c. Detection of slots in parking lots
- d. All of these

Q3. Select the statement(s) that are true for smart health.

Statement I: Smart health is low-cost and portable.

Statement II: Smart health allows remote check-ups and diagnosis.

Statement III: Smart health is effortless health monitoring.

- a. Statement I
- b. Statement II
- c. Statements I, II, and III
- d. None of these

Q4. What refers to combining information from multiple sensor sources?

- a. Information Collection
- b. Multi-sensor deployment
- c. Multi-sensor dissemination
- d. Multi-sensor data fusion

Q5. The ensemble of all the decisions occur at the

- a. Feature level
- b. Decision level
- c. Pixel level
- d. All of these

Q6. The smart parking reduces traffic

- a. mobility
- b. area
- c. analysis
- d. congestion

Q7. Which of the following is the correct full form of DLNA Standards for HAN?

- a. Digital Lifestyle Network Alliance
- b. Digital Living Network Alliance
- c. Digital Lifestyle Network Algorithm
- d. None of these

Q8. Which of the following is a type of sensing?

- a. Stationary
- b. Mobile
- c. Both a and b
- d. Neither a nor b

Q9. Smart home infrastructure cannot include wireless devices.

- a. True
- b. False

Q10. Which of the following is a layer of Zigbee ?

- a. Physical layer
- b. MAC Layer
- c. Network Layer
- d. All of these

Q11. Which of the following is a phase of ICV development?

- a. Based on 2G
- b. Based on 4G LTE
- c. Vehicles connected to cloud
- d. All of these

Q12. Which of the following is a property of V2X?

- a. Restricted to a single source
- b. Distributed architecture
- c. Both of a and b
- d. Neither a nor b

Q13. The vehicles cannot be mobile in the Ad-hoc domain of VANET.

- a. True
- b. False

Q14. Which of the following is a domain of VANET?

- a. In-vehicle
- b. Ad-hoc
- c. Both a and b
- d. Neither a nor b

Q15. Fill in the blank. ICV is based on

- a. Dedicated Short Range Communication
- b. Directed Short Range Communication
- c. Dedicated Small Range Communication

d. All of these

@Exam
Buddy

WEEK 11 Assignment

Q1. What are some of the other names of the smart grids?

- a. Energy internet
- b. Electricity with a hand
- c. Electrolyte
- d. All of these

Q2. Smart Grid follows which type of flow of energy?

- a. Bidirectional
- b. Unidirectional
- c. Both a and b
- d. Neither a nor b

Q3. Which of the following is a benefit associated with smart grids for customers?

- a. Reduced transmission of electricity
- b. Higher electricity rates
- c. Less security
- d. Different pricing options

Q4. Which of the following is a property of smart grid related to power system efficiency?

- a. Power monitoring
- b. Asset Management
- c. Distribution automation
- d. All of these

Q5. Fill in the blank.

In a home can have power from distributed resources.

- a. Peaking
- b. Islanding
- c. Neither a nor b
- d. Both a and b

Q6. Which of the following aggregate the energy consumption or energy request of a certain geographical area?

- a. DAUS
- b. Meter Data Management System
- c. Buffer
- d. None of these

Q7. Which of the following statements are true about Dynamic System Attacks?

Statement I: Replay attacks compromises sensors and monitors their outputs.

Statement II: D-DIA can lead to a system collapse.

Statement III: Covert attack is a closed loop version of replay attacks.

- a. Statements I and II

- b. Statements I and III
- c. Statements II and III
- d. Statement I, II and III

Q8. Fill in the blank.

..... is performed by compromising the availability of the grid component.

- a. Gateway
- b. Data injection attacks
- c. AMH
- d. Denial of service

Q9. Fill in the blank.

IIoT is a network of

- a. Physical objects
- b. Systems
- c. Platforms
- d. All of these

Q10. Fill in the blank.

..... is based on a wrap and re-use approach.

- a. AoT
- b. PoT
- c. Toll
- d. IIoT

Q11. Mechanized production is a part of the 4th Industrial Revolution.

- a. True
- b. False

Q12. Which of the following happened in the 3rd Revolution?

- a. Mass production
- b. IIoT
- c. Mechanized production
- d. None of these

Q13. Which of the following is used to improve the interoperability of different systems?

- a. Standardization

- b. Optimization
- c. Monitoring
- d. None of these

Q14. Big data is characterized by 7 Vs.

- a. True
- b. False

Q15. What is Hadoop used in?

- a. Distributed processing of large datasets
- b. Small clusters of computers
- c. Both a and b
- d. Neither a nor b

WEEK 12 Assignment

Q1. Qualitative analysis does not deal with the analysis of data that is categorical in nature.

- a. True
- b. False

Q2. Fill in the blank.

Examples of dispersion measures include and

- a. Discrete, categorical
- b. Continuous, quantitative
- c. Discrete, quantitative
- d. Range, Variance

Q3. Select the statement(s) that denote the key variables of determining statistical significance.

Statement I: Range size

Statement II: Effect size

Statement III: Sample size

- a. Statement I
- b. Statement I and II
- c. Statements II, and III
- d. None of these

Q4. The different objectives of AgriSens includes -

- a. More yields with less water
- b. Save limited water resource
- c. Automatic irrigation
- d. All of these

Q5. The two most relevant sensors directly used in agriculture are

- a. Soil moisture and ECG sensor
- b. Soil moisture and water level sensor
- c. ECG sensor and water level sensor
- d. All of these

Q6. The integrated design of the remote server includes

- a. Data server
- b. Web server
- c. Multi users server
- d. All of these

Q7. Select the correct order of the component layers present in the IoT healthcare.

- a. Sensing layer, cloud platform layer, aggregated layer, processing layer
- b. Sensing layer, aggregated layer, processing layer, cloud platform layer
- c. Aggregated layer, sensing layer, processing layer, cloud platform layer
- d. Sensing layer, processing layer, aggregated layer, cloud platform layer

Q8. Which of the following networks is used in AmbuSens?

- a. IEEE 802.15.4
- b. 6LoWPAN
- c. Wireless Body Area Network
- d. IEEE 802.15.2

Q9. Wireless IoT driven solutions for remote healthcare facility provisioning brings healthcare to patients than bringing patients to healthcare.

- a. True
- b. False

Q10. Fill in the blank. The statistical data analysis tools can be applied on

- a. Sensor data
- b. Images
- c. Videos
- d. All of these

Q11. Which of the following sensors are present in smartphones handheld devices are used for activity monitoring?

- a. EEG and GPS
- b. Accelerometer and EEG
- c. Accelerometer and Gyroscope
- d. All of these

Q12. Which of the following is the primary disadvantage of using camera-based activity tracking?

- a. Accurate
- b. Processing intensive
- c. Both Accurate and Processing intensive
- d. None of these

Q13. By performing continuous monitoring of a person's activity, it is not possible to observe his/her behavior or to identify any repetitive pattern in his/her day-to-day activity.

- a. True
- b. False

Q14. Which of the following are the inbuilt sensors that are present in high end smartphones?

- a. ECG and EEG
- b. Accelerometer, proximity sensor, and EEG
- c. Accelerometer, Compass, and Gyroscope
- d. Pressure sensor and NPK sensor

Q15. Fill in the blank. Processing the handheld activity device data with artificial intelligence can be used for

- a. Fall detection
- b. Heart rate detection
- c. Vehicle detection
- d. All of these
